Annual Indexes

Volume 5—October 1975 to July 1976

1. Subject Index

A

Addendum to IES guide for reporting general lighting equipment engineering data 243
A field evaluation of pavement luminance and glaremark 37
Analysis of operating circuits for discharge lamps by the simulation method 92
An analytical approach to the analysis of exterior lighting design 150
A new HID ballast concept 229
A new metal halide ultraviolet curing source 45
A visibility metric for safe lighting of city streets 85

B

Ballast concept, A new HID 229
Blur of the retinal image of an object illuminated by low pressure and high pressure sodium lamps 158

C

Calculating direct illumination from the sky under clear sky conditions 218
Circuits for discharge lamps by the simulation method, Analysis of operating 92
City streets, A visibility metric for safe lighting of 85
Coil pitch and wire diameter variations on incandescent filament behavior, The effect of 3
Color rendering properties of light sources, Power in spectral bands as an evaluation of 148
Color, Roadway visibility as a function of light source 20
Colorimetry of light sources, Practical guide to 177
Committee Reports
  Nuclear power plant lighting 107
  Practical guide to colorimetry of light sources 177
  Addendum to IES guide for reporting general lighting equipment engineering data 243
  IES guide for photometric measurements of roadway sign installations 244
Computation of visual comfort probability, On the 207
Computer techniques for calculating luminance, Measurement of directional reflectance of pavement surfaces and development of 118

D

Daylighting
  Calculating direct illumination from the sky under clear sky conditions 218
Discharge lamps by the simulation method, Analysis of operating circuits for 92
Discharge lamps by simulation method, Analysis of operating circuits for 92
Discussion of previously published papers 116

E

Electric Generating Station
  Nuclear power plant lighting 107
Engineering data, Addendum to IES guide for reporting general lighting equipment 243
Equivalent sphere illumination meter—theory and practical embodiment 58
Equivalent sphere illumination, The potential of location within a room in producing 169
ESI meter—theory and practical embodiment 58
Experimental and theoretical consideration of the life limiting factors in quartz-bromine lamps 74
Exterior lighting design, An analytical approach to the analysis of 150

F

Flashtube power supplies, Xenon 223
Fluorescent lamps—improved photometric integrating sphere 165
Fluorescent lamps with internal starting aids, Starting behavior of rapid start ... 131
Fluorescent lamp wall efficiency 137

G

General lighting equipment engineering data, Addendum to IES guide for reporting 243
Glaremark, A field evaluation of pavement luminance and 37

H

HID ballast concept, A new 229
High-intensity discharge lamps, Reducing additive segregatin in metal halide 12
High pressure sodium lamps, Blur of the retinal image of an object illuminated by low pressure and 158
High pressure sodium starting circuits—the effect of system variations on pulse parameters 49
High pressure sodium systems, Starting pulse tester for 195
HPS starting circuits—the effect of system variations on pulse parameters 49
Hot metal vapor lamps—lamp characteristics and circuit requirements, Restriking 26

I

IERI Reports
  Blur of the retinal image of an object illuminated by low pressure and high pressure sodium lamps 158
  Measurement of directional reflectance of pavement surfaces and development of computer techniques for calculating luminance 118
  Performance of complex tasks under different levels of illumination. Part I—Needle probe task 235
IES guide for photometric measurements of roadway sign installations 244
Incandescent filament behavior, The effect of coil pitch and wire diameter variations on 3
Incandescent lamp failure mechanisms ... 31
Industrial Lighting
  Nuclear power plant lighting 107
Interior cabin illumination, Space shuttle orbiter 67
Introducing the candidates 185

L

Lamp characteristic and circuit requirements, Restriking hot metal vapor lamps 26
Lamp failure mechanisms, Incandescent .. 31
Lamps for assessing metamerism. Part II—Lamp design 79
Lamp wall efficiency, Fluorescent 137
Light source color, Roadway visibility as a function of 20
Light sources, Power in spectral bands as an evaluatin of color rendering properties of 148
Light sources, Practical guide to colorimetry of 177
Low pressure and high pressure sodium lamps, Blur of the retinal image of an object illuminated by 158
Luminance and glaremark, A field evaluation of pavement 37
Luminance, Measurement of directional reflectance of pavement surfaces and development of computer techniques for calculating 118

M

Measurement of directional reflectance of pavement surfaces and development of computer techniques for calculating luminance 118
Metal halide high-intensity discharge lamps, Reducing additive segregation in 12
Metal halide ultraviolet curing source, A new 45
Metarism, Lamps for assessing. Part II—Lamp design 79

N

Nuclear power plant lighting 107

O

On the computation of visual comfort probability 207
Optimization of the quality of roadway lighting installations—especially under adverse weather conditions 99

P

Pavement luminance and glaremark, A field evaluation of 37
Pavement surfaces and development of computer techniques for calculating luminance, Measurement of directional reflectance of 118
Performance of complex tasks under different levels of illumination. Part I—Needle probe task 235
Photochemical applications—an imporved 253.7-nanometer radiator 143
Photometric integrating sphere, Fluorescent lamps—improved 165
Photometric measurements of roadway sign installations, IES guide for 244
Power in spectral bands as an evaluation of color rendering properties of light sources 148
Power plant lighting, Nuclear 107
Power supplies, Xenon flashtube 223
Practical guide to colorimetry of light sources 177

M

Measurement of directional reflectance of pavement surfaces and development of computer techniques for calculating luminance 118
Metal halide high-intensity discharge lamps, Reducing additive segregation in 12
Metal halide ultraviolet curing source, A new 45
Metarism, Lamps for assessing. Part II—Lamp design 79

N

Nuclear power plant lighting 107

O

On the computation of visual comfort probability 207
Optimization of the quality of roadway lighting installations—especially under adverse weather conditions 99

P

Pavement luminance and glaremark, A field evaluation of 37
Pavement surfaces and development of computer techniques for calculating luminance, Measurement of directional reflectance of 118
Performance of complex tasks under different levels of illumination. Part I—Needle probe task 235
Photochemical applications—an imporved 253.7-nanometer radiator 143
Photometric integrating sphere, Fluorescent lamps—improved 165
Photometric measurements of roadway sign installations, IES guide for 244
Power in spectral bands as an evaluation of color rendering properties of light sources 148
Power plant lighting, Nuclear 107
Power supplies, Xenon flashtube 223
Practical guide to colorimetry of light sources 177

Q

Quality of roadway lighting installations—especially under adverse weather conditions, Optimization of the 99
Quartz-bromine lamps, Experimental and theoretical considerations of the life limiting factors in 74

R

Rapid start fluorescent lamps with internal starting aids, Starting behavior of 131
Reducing additive segregation in metal halide high-intensity discharge lamps .. 12
Reflectance of pavement surfaces and development of computer techniques for calculating luminance, Measurement of directional 118
Restriking hot metal vapor lamps—lamp characteristic and circuit requirements .. 26
Roadway Lighting
- A visibility metric for safe lighting of city streets 85
- A field evaluatin of pavement luminance and glaremark 37
- Blur of the retinal image of an object illuminated by low pressure and high pressure sodium lamps 158
- IES guide for photometric measurements of roadway sign installations 244
- Measurement of directional reflectance of pavement surfaces and development of computer techniques for calculating luminance 118
- Optimization of the quality of roadway lighting installations—expecially under adverse weather conditions ... 99
- Roadway visibility as a function of light source color 20

S

Scandium-sodium iodide arc lamp—spectral behavior through early life 200
Sign installations, IES guide for photometric measurements of roadway 244
Sodium lamps, Blur of the retinal image of an object illuminated by low pressure and high pressure 158
Space shuttle orbiter interior cabin illumination 67
Starting behavior of rapid start fluorescent lamps with internal starting aids 131
Starting pulse tester for high pressure sodium systems 195

T

Testing Procedures
- Addendum to IES guide for reporting general lighting equipment engineering data 243
- Practical guide to colorimetry of light sources 177
- IES guide for photometric measurements of roadway sign installations 244

The effect of coil pitch and wire diameter variations on incandescent filament behavior 3
The ESI meter—theory and practical embodiment 58
The potential of location within a room in producing equivalent sphere illumination 169

U

Ultraviolet curing source, A new metal halide 45

V

Vapor lamps—lamp characteristic and circuit requirements, Restriking hot metal . 26
Visibility metric for safe lighting of city streets 85
Visual comfort probability, On the computation of 207

W

Wire diameter variations on incandescent filament behavior, The effect of coil pitch and 3

X

Xenon flashtube power supplies 223
